### **About the Computerworld Honors Program**

Founded by International Data Group (IDG) in 1988, the Computerworld Honors Program is governed by the not-for-profit Computerworld Information Technology Awards Foundation. In its 18th year, Computerworld Honors is the longest running global program to honor individuals and organizations that use information technology to benefit society.

Each year, the program's Chairmen's Committee, a group of 100 Chairmen/CEOs of global technology companies, nominates individuals and organizations around the world whose visionary application of information technology promotes positive social and economic progress. Nominations are evaluated by an independent board of CIO-level judges who select laureates, finalists and award winners, in 10 industry-related categories, to be honored at a Laureate Medal Ceremony. This year's ceremony and accompanying Gala Awards Program will take place on June 5, 2006 at the Andrew W. Mellon Auditorium in Washington, D.C.

The technology achievements honored by this program are preserved and protected in national archives, and in over 250 universities, museums and research institutions throughout the world. Additional information about the program and a Global Archive of past laureate case studies and oral histories can be found at the Computerworld Honors website: [www.cwhonors.org](http://www.cwhonors.org).
